

# Leasing and Rental Company Fleets

Geotab's GPS fleet platform has been designed with the fleet user in mind and enables Checkmate reports to drive payback in several areas. For leasing companies, Geotab represents a solid platform to ensure vehicles are returned at the end of the lease in marketable value.

## Tracking Vehicle Usage

Geotab tracks the vehicles use throughout its term in a central server. Vehicle usage outside of designated state borders, over-speeding, aggressive braking, and excessive idling all lead to higher risks of liability, damage, and accident claims.

## Business vs. Personal Miles Driven

Logs are automatically collected and saved for long term record keeping in the event of an audit.

## Fuel Tax Rebates

Using Geotab, leasing or rental fleets with vehicles over 26,000 GVW that qualify for fuel tax rebates can accurately track the distance and fuel up locations.

## Geotab Provides The Most Accurate GPS Trip Recording In The World
