

StealthNet™

Designed for concealed placement to help eliminate trailer theft and cargo loss, StealthNet is easily installed to various locations for effective covert asset tracking.

With a competitive battery capacity, StealthNet provides six to nine months of reporting without charge.

Gain actionable insights to trailer location, health and cargo with expandable sensor options such as: TPMSCheck, CargoCheck, CargoVision and DoorCheck for reliable and instant access to important data in real-time.

Anti-theft placement

Covert installation help eliminate trailer theft and cargo loss.

Reliable GPS tracking

Provides reliable GPS tracking to ensure fleets have real-time visibility into asset locations, enhancing operational efficiency and reducing downtime.

Its dependable performance keeps fleet managers connected to their assets anytime, anywhere.

Expandable

Data from a wide variety of wired and wireless sensors are available through Bluetooth LE connections
