

GO9+

Advanced vehicle tracking featuring onboard Wi-Fi

Reliable on-road internet connection has arrived.

The GO9+ delivers the benefit of a high-speed internet connection ideal for ridesharing, small businesses, families, fleet and corporate vehicles.

Never miss a beat. Stay in sync with coworkers, friends and family safely while traveling to your destination. Connect to the platform that helps you reduce fleet costs, increase productivity and efficiency, improve safety, sustainability, and strengthen compliance.

GEOTAB®

Geotab GO9+

Stay connected. Stay productive. Stay in sync.

Discover how the leading telematics device featuring onboard Wi-Fi can help improve your business functions.

Onboard Wi-Fi hotspot

Take advantage of a reliable onboard internet connection while on the road (category 4 LTE).

Compact, durable design

The small but mighty GO9+ is housed in flame retardant black ABS.

Intelligent in-vehicle driver coaching

Improve driving habits with in-vehicle feedback. Set up rules to reduce unwanted driving behaviours like speeding, idling, or not wearing a seat belt. Advance driver safety further by adding a buzzer or Geotab GO TALK for in-vehicle verbal coaching.

Breakthrough collision detection and notification

Collision alerts keep you in the know and provide a detailed summary of events. Detection of a suspected collision will prompt the automatic upload of detailed data from the device to allow for forensic reconstruction of the event.

Over-the-air updates

New updates and improvements are sent to your device seamlessly. The GO9+ permits over-the-air (OTA) initial provisioning and firmware updates for the device, GPS, and the cellular modem.

Engine and battery health assessments

Access valuable information from EVs and conventional vehicles: vehicle health, vehicle identification number (VIN), odometer, engine faults, seat belt, battery state of charge (EVs) and more.

LTE connectivity

Communication on the category 4 LTE network delivers speed where you need it and longevity for peace of mind.

Device expandability via IOX Technology

The IOX port lets you get even more from your device. Integrate with third-party providers that suit your needs. Add on hardware for Driver ID, hours of service (HOS), temperature tracking, asset tracking, satellite communication and more.

Built-in auto-calibrating accelerometer and gyroscope

Measure precise vehicle movements such as harsh braking and acceleration with the high quality accelerometer and gyroscope.

Near-real-time vehicle data

Get rich, accurate data on location, vehicle health, driving behavior and much more.

End-to-end cybersecurity

Geotab platform security provides end-to-end data protection. Security methods include authentication, encryption, message integrity verification, unique ID, non-static security keys, and over-the-air updates that use digitally-signed firmware to verify that updates come from a trusted source. Device security features are implemented using a FIPS 140-2 validated cryptographic module. Certificate #3371.

Geotab GO9+ highlights

Reliable connectivity

- + Onboard Wi-Fi hotspot with LTE (Category 4) helps ensure you are always connected with lightning fast speeds while on the road. Connect your phone, tablet, or other Wi-Fi enabled device. Enjoy the freedom of connectivity with GO9+.
- + The device code space provides the capacity for further native vehicle support and added features — such as improved EV energy support and broader fuel usage support.
- + 3D accelerometer and 3D gyroscope analyze angular velocity to provide enhanced data for collision detection and examination as well as harsh driving events.
- + Global Navigation Satellite System (GNSS) module offers both GPS and GLONASS support. This module provides improved latch times (time-to-first-fix) and enhanced location data accuracy.
- + OTA updates for the device, GPS, and cellular modem.
- + The latest firmware and configuration are applied at time of installation for enhanced privacy, security, and reliability.

See support document for full technical specifications.

Customize your solution

Access the largest telematics ecosystem of integrated third party hardware and software solutions. Find mobile apps, hardware Add-Ons, software Add-Ins and more on the Geotab Marketplace. Maximize your return on investment with Geotab's expandability options. Can't find what you're looking for? Use our SDK & APIs to build your own custom solutions to meet your business needs.

Simple installation

Plug the GO9+ directly into your vehicle's OBD II port or with an adapter where needed. No antenna or wire-splicing required. The device auto-calibrates to accommodate for installation in any orientation. See installation sheet for full details.

It's as easy as 1-2-3

 MyGeotab SDK

You must select the correct Geotab hardware suitable for your specific installation environment and vehicle use. For installations where exposure to the elements (e.g., liquids, dust, or interior wet cleaning/powerwash) is anticipated, select the GO RUGGED device (GR8 & GR9 are IP67 & IP68 rated, respectively). For additional information regarding environmental contaminants, see the applicable installation instructions in the Important Safety Information & Limitations of Use document.
