

Know where your assets are. Always.

Geotab helps businesses of all sizes keep their critical equipment visible, protected, and productive — with real-time tracking, flexible connectivity, and everything managed in one platform. From urban job sites to remote work zones, choose the solution that goes as far as your assets do.

Choose the tracker that fits how you work

	GO Anywhere	GO Anywhere Plus
Connectivity: Stay connected to your assets across the network	Cellular (4G LTE)	Cellular (4G LTE) + T-Mobile T-Satellite
Coverage: Visibility wherever your equipment goes	Within reliable cellular network range	Virtually anywhere — remote, rural, and off-grid included
Power: Flexible installation for any asset type	Non-replaceable battery (3–5 year life)	Wired OR replaceable battery (3–5 year life)
Equipment insights: Go beyond location with operational data	Location tracking	Ignition detection + engine hours when hardwired to equipment
Tracking frequency: Updates that match your monitoring needs	Time-Based Movement-Delayed Movement-Immediate	All GO Anywhere modes + High-Frequency (15-min updates)
Theft prevention: Alerts before losses happen	Movement-Immediate alerts	Movement-Immediate alerts
Durability: Built for demanding work environments	Dust, water & temperature resistant	Dust, water & temperature resistant
Platform: Manage your entire operation from one dashboard	Full MyGeotab integration — assets, vehicles, and cameras in one place	Full MyGeotab integration — assets, vehicles, and cameras in one place
Best for:	Urban and suburban operations within reliable cellular range	Remote job sites, rural routes, and off-grid environments

Which solution is right for you?

GO Anywhere is the right fit if your assets operate within reliable cellular coverage — think urban fleets, suburban job sites, and equipment that stays close to the network.

GO Anywhere Plus is the right fit if your operation takes you off the beaten path. Remote job sites, rural routes, cross-border operations, or anywhere standard cellular falls short — GO Anywhere Plus keeps you connected via satellite so nothing goes dark.

If the asset you are tracking has a power source (generators, heavy equipment, trailers with running lights), GO Anywhere Plus unlocks utilization intelligence (engine hours, ignition cycles) that GO Anywhere simply can't provide — making it a fleet management tool, not just a locator.

Both solutions integrate fully into MyGeotab, giving you one platform to manage your entire fleet and all your assets together.
