

GEOTAB GO[®] ANYWHERE[™]

Managing a fleet comes with challenges.

Cost reduction and operational efficiency are key challenges for fleet management. Businesses need visibility not only into their vehicles but also into non-powered and powered assets to answer questions like:

- Where are the assets?
- How are they being utilized?
- How can you optimize productivity?

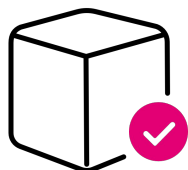

The total value of stolen goods exceeded

\$39M
in Q3 2024.

Enhance asset operational efficiency with Geotab GO[®] Anywhere[™].

**Optimized asset
utilization**

**Exceptional
durability**

**Strengthened
security**

Reliable data

**Decreased
operational costs**

— T-Mobile Fleet Management powered by Geotab®

This open and scalable platform captures the broadest and richest vehicle data for fleets of 1 to 100,000+ vehicles.

Since 2012

joint customers

Supporting

10,000+

make/model/year
combinations

Including

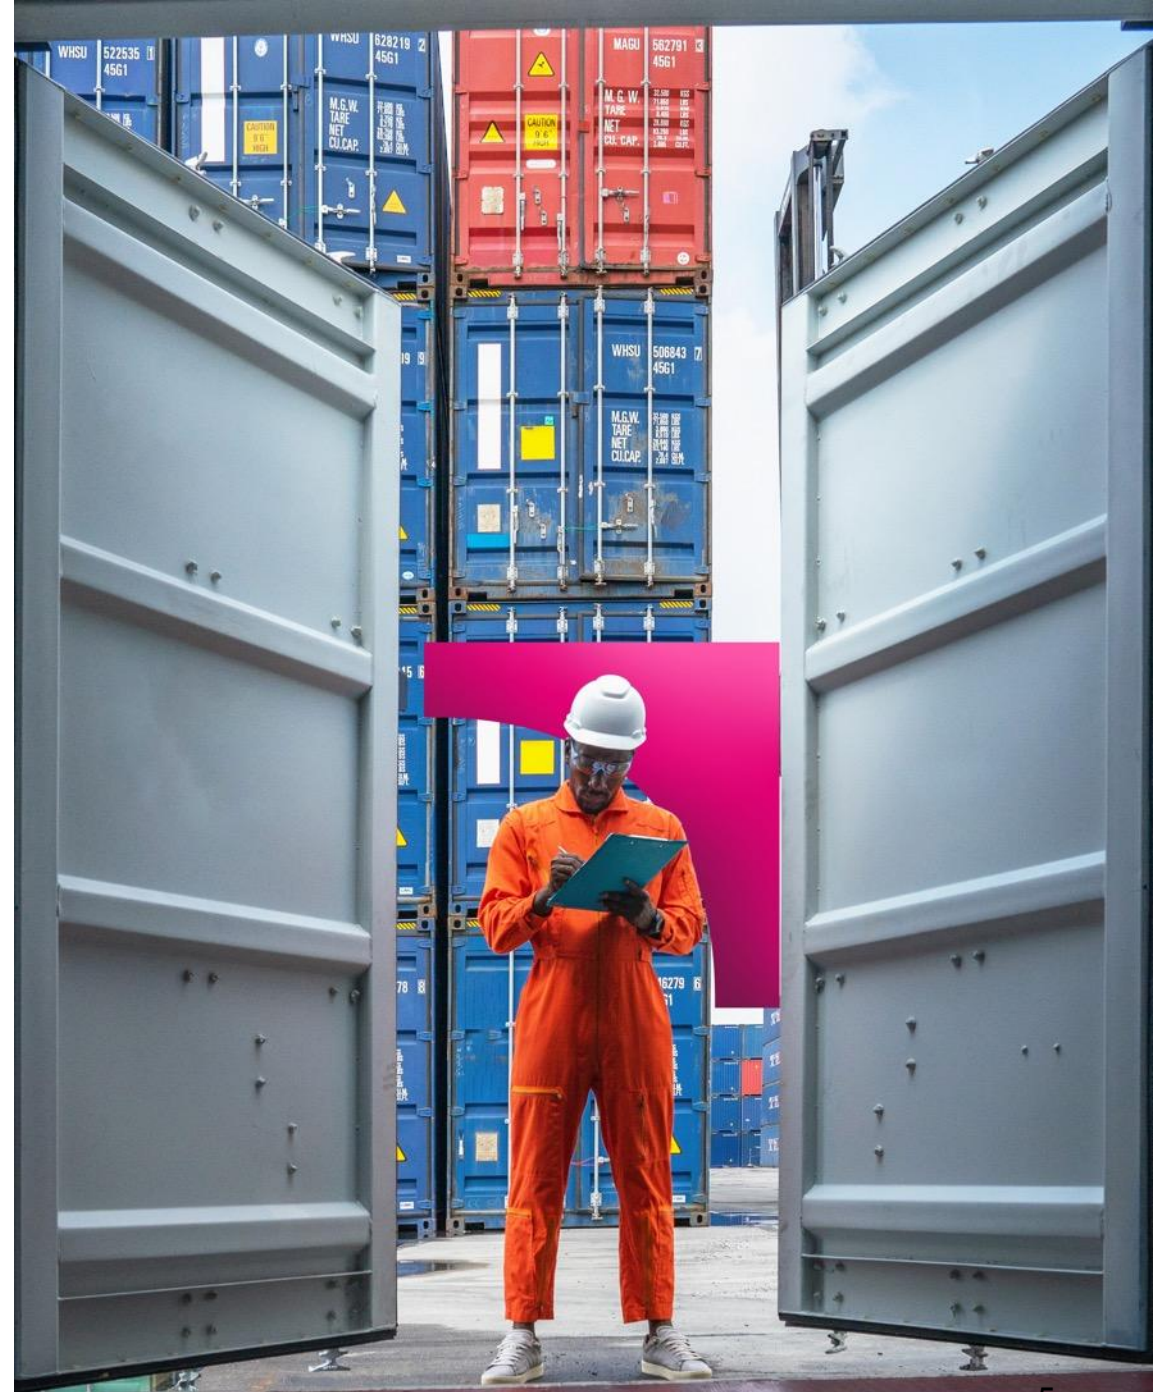

300+

electric vehicle
combinations

Protect and optimize your assets with Geotab GO Anywhere.

Geotab GO Anywhere Asset Tracker maximizes visibility over your assets—providing easy-to-use, data-driven tracking solutions for your high-value powered and non-powered assets.

Geotab GO[®] Anywhere[™] Asset Tracker

- Rugged design with IP68 and IP69k ratings to withstand harsh conditions
- Daily data collection—integrated from both assets and vehicles and reported to the MyGeotab platform
- Continual data tracking even when out of reach of cellular coverage*
- Unique ID and dynamic security key to prevent device spoofing
- Continual improvement with over-the-air firmware updates
- Up to 3-5 years battery life ¹

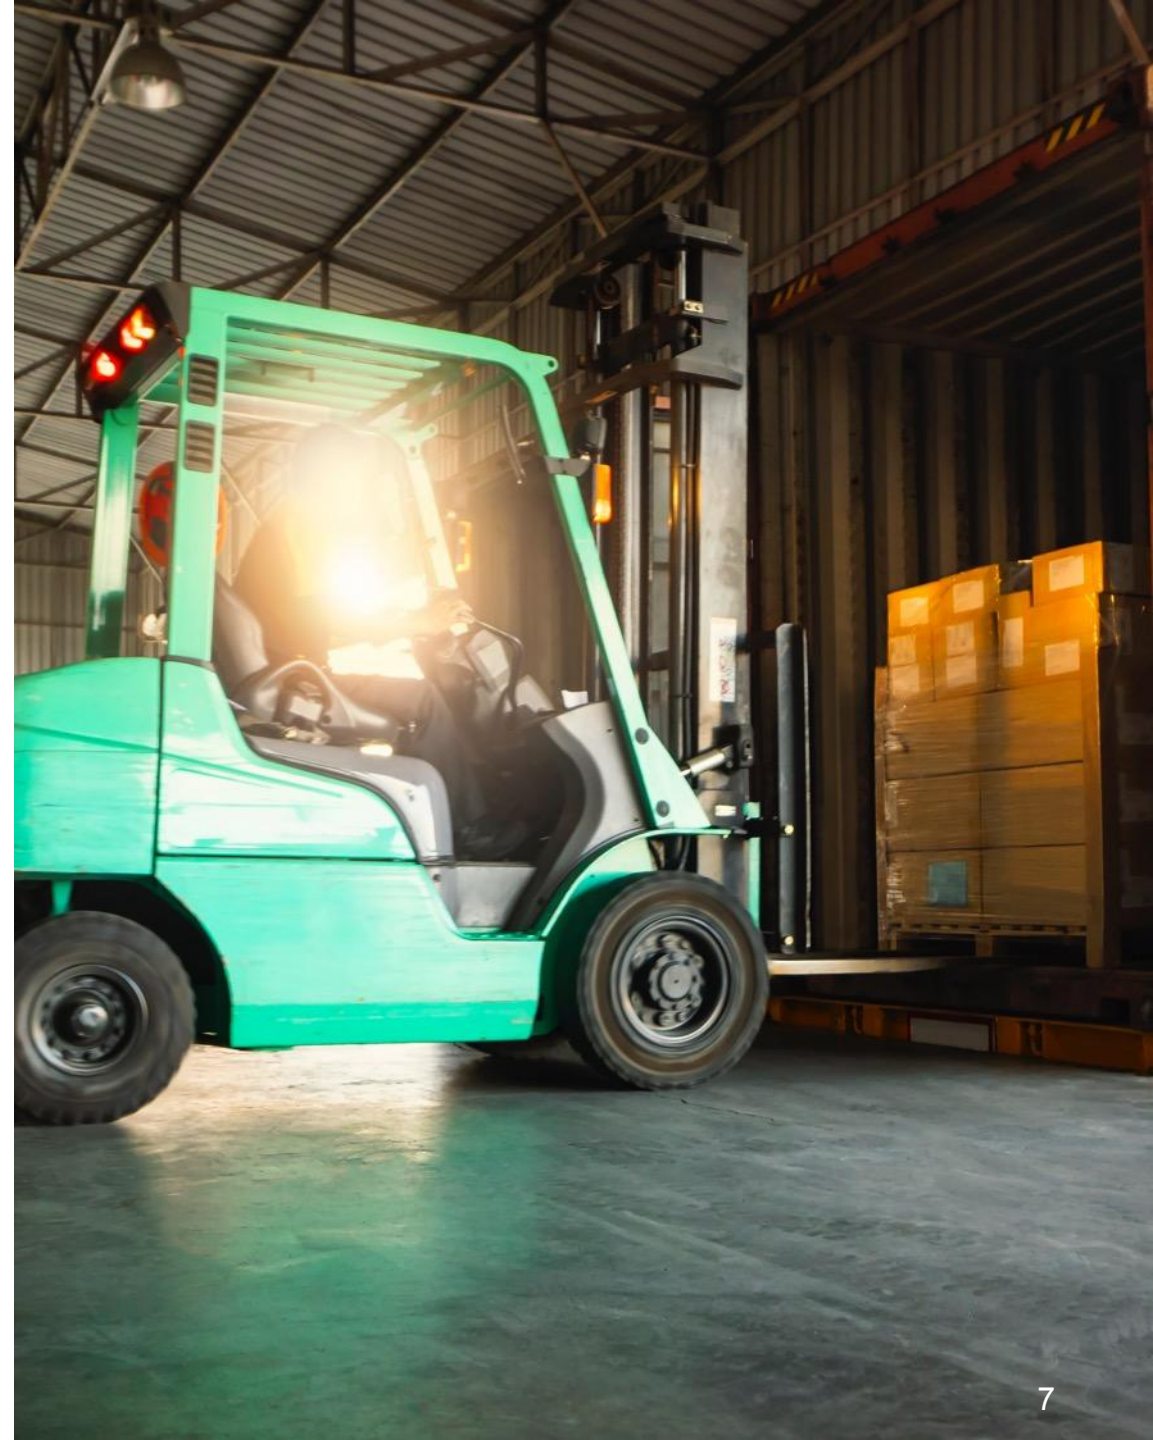

¹ Depending upon ping rate and use

GEOTAB[®]

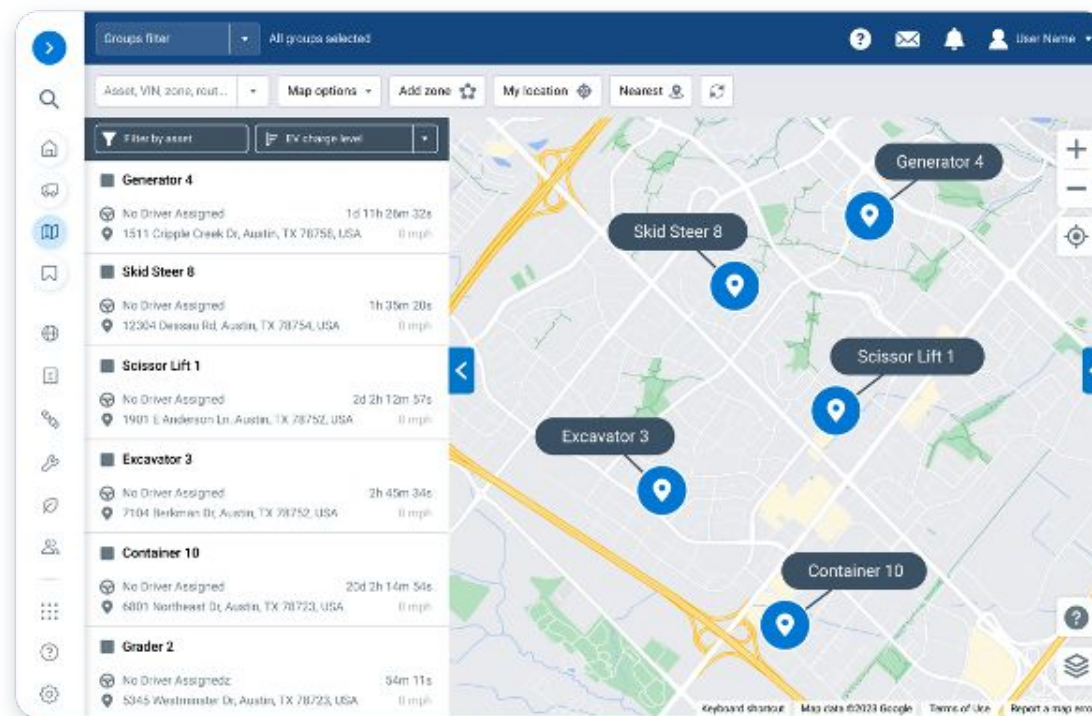

Depend on high-quality, reliable asset tracking.

- Consistent asset visibility even through coverage gaps.
- Built for durability and longevity to deliver dependable performance for diverse assets and environments
- Continuous monitoring with secure and accurate data

Simplify asset and vehicle management

- Integrate seamlessly with the MyGeotab® Platform.
- Manage all Geotab solutions and the robust data they provide for all assets and vehicles in one place.
- Combine data from both assets and vehicles.

Leverage data for smarter decision-making

- Translate data into actionable insights for better asset deployment and protection.
- View asset utilization data to gain a deeper understanding of customer needs and how assets are used—leading to more efficient operations and reduced wastage.
- Enhance the accuracy and efficiency of routine equipment maintenance with near real-time reports on asset status and location.

Geotab GO[®] Anywhere[™] in action

Geotab GO Anywhere provides a greater look into where your assets are and where they have been, enabling better asset utilization and productivity for your high-value assets.

Monitor the location and movement of powered assets like generators and remote monitoring stations.

Track non-powered assets like construction equipment, trailers, and portable toilets to optimize use.

Quickly locate assets in cases of misplacement or theft.

Balance wear and tear by monitoring usage patterns and scheduling maintenance.

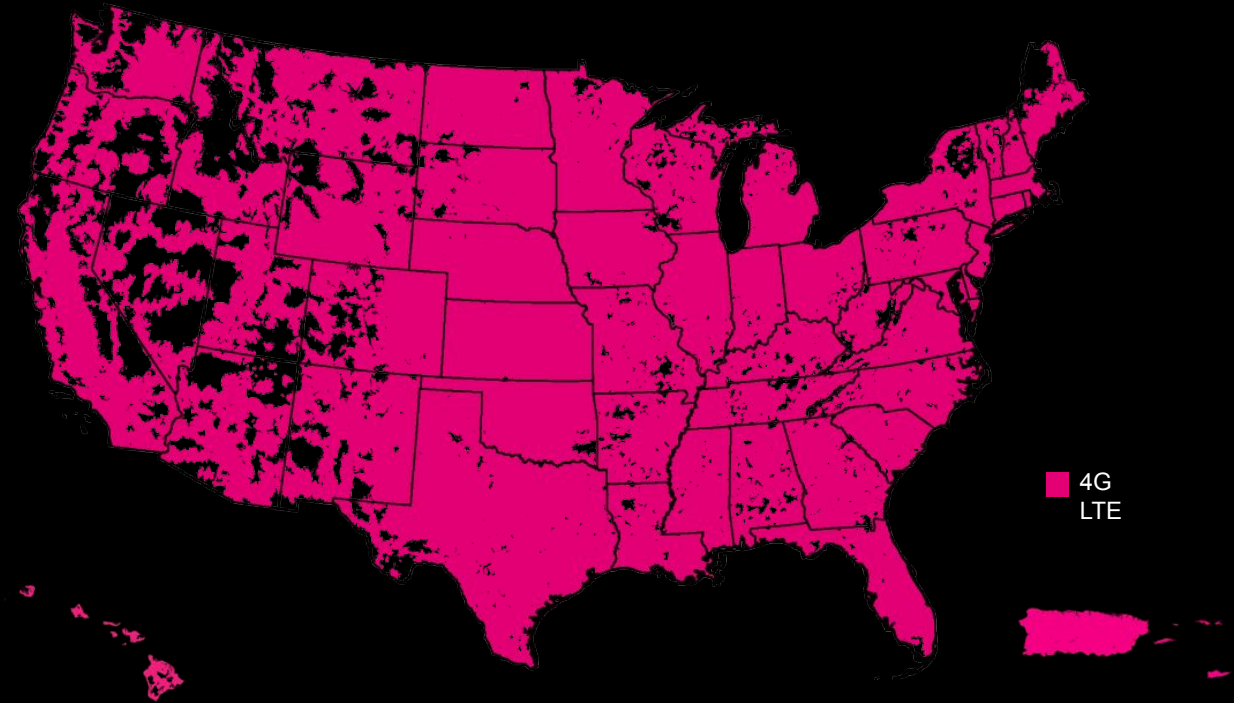

Enhance safety by ensuring assets are operating within predefined zones and times.

Accurately bill for asset usages by tracking how long an asset is at a customer's site.

We cover 99% of Americans with LTE.

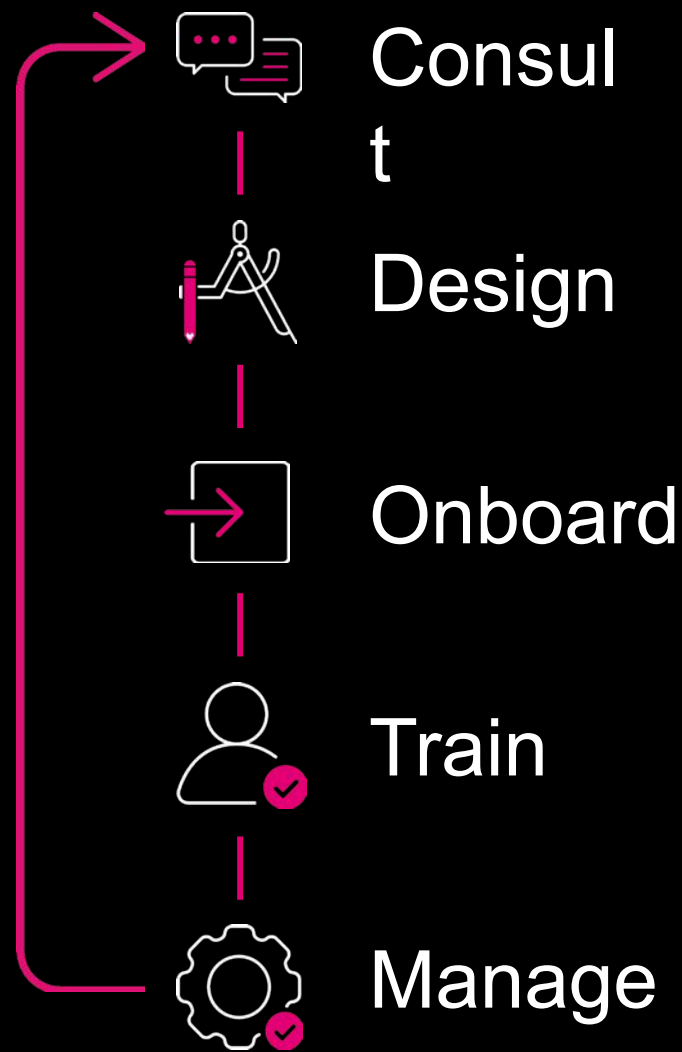

- Devices store location and usage data when out of coverage.
- Automatically transmit stored data once coverage is restored.
- Ensure no critical tracking information is lost.

Map includes 600MHz coverage; capable device
required

Easily add GO[®] Anywhere[™] to your existing system.

- Integrating Geotab GO Anywhere is straightforward and tailored to your business needs.
- Customized lifecycle journey from design to deployment—for businesses of all sizes across multiple industries
- Consultation with experts specialized in specific industries and asset tracking to help you navigate the business and technical complexities of IoT
- Exceptional customer experience
