

GEOTAB GO[®] ANYWHERE[™] ASSET TRACKING

Take control of your critical assets.

Assets that move or can be moved can also be lost or stolen. It can be a challenge to keep track of and manage them efficiently. With Geotab GO Anywhere Asset Tracker, integrated with the MyGeotab fleet management platform, you gain a proactive, cost-effective solution for easily managing your high-value assets from a single platform.

✓ Unified asset management

Efficiently manage all assets in MyGeotab with a single, integrated platform for streamlined operations and improved oversight.

✓ Connected asset tracking

Effortlessly monitor and track your assets, gaining access to both current and historical location data for optimal asset management.

✓ Optimized asset utilization

Get a clear view of how and where your assets are deployed, facilitating smarter decisions for optimal use of resources.

✓ Strengthened security measures

The tracker's High Frequency Update feature allows you to quickly locate and recover stolen assets, avoiding the cost and hassle of replacement.

✓ Decreased operational costs

Accurate asset location improves productivity and minimizes financial risk. If assets are stationary, GO Anywhere will enter a sleep mode, conserving battery life.

✓ Reliable data collection

Configure updates for fixed call-in times, up to every 2 hours, or movement-based call-in times.

Increased resilience

✓ Specifically designed to withstand vibration, movement, and harsh environmental conditions with its IP68 and IP69-K ratings.

INCREASE VISIBILITY INTO YOUR HIGH-VALUE ASSETS.

Geotab GO Anywhere™ provides a greater look into where your assets are and where they have been, enabling better asset utilization and productivity for high-value assets such as trailers, containers, generators and more.

GO Anywhere in action:

- Monitor the location and movement of trailers, containers, and other mobile assets.
- Track powered and non-powered assets like construction equipment, generators, and portable toilets to optimize use.
- Quickly locate assets in case of misplacement or theft with timely location updates.
- Balance wear and tear by monitoring asset usage patterns and scheduling maintenance.
- Accurately bill for asset usage by tracking how long an asset is at a customer's site.
- Enhance safety by ensuring assets are operating within predefined zones and times.

GO Anywhere is ideal for the following assets:

- | | |
|---|--|
| ■ Containers/intermodal shipping containers | ■ Logistics/shipping equipment |
| ■ Construction equipment - generators, tools, scissor lifts, etc. | ■ Operational equipment for airport and marine use |
| ■ Porta-pottys | ■ Trash bins |
| ■ Trailers | ■ Utility equipment |
