Choose the Leading Solution Trusted to Manage Over 4 Million Vehicles

Manage, monitor, and optimize your fleet better and in more places. T-Mobile for Business and the powerful Geotab open platform provide the critical intelligence and visibility to manage your mobile business today while offering unique customization, flexibility, and scalability to meet your needs now and down the road as you grow.

Dig deeper into five powerful ways this solution can impact your business.

1. Save Money on Fuel Monitor each vehicle's usage and assess how driver performance and behavior (aggressive acceleration, idling for long periods, hard braking, etc.) affect consumption.

2. Know Where Your Vehicles and Drivers Are Track vehicle and driver locations. Get alerts if your vehicles are used in unauthorized places, manners, and times. Make theft recovery of your vehicles, tools, and equipment more likely.

3. Reduce Maintenance & Downtime On-time preventative maintenance reduces vehicle downtime. Diagnostic alerts, accurate engine hour tracking, and automated service notifications keep your vehicles on the road working for you.

4. Optimize Routing & Improve Customer Satisfaction Gain near real-time visibility and actionable insights into vehicle location, job status, routing, and arrival time. If there are delays in transit, customer notifications can be automated.

5. Lower Risk & Improve Safety Safer driving can translate to fewer accidents, lower insurance premiums, and reduced legal problems. Sensors, data, and optional cameras allow you to coach drivers to enhance safety.

Simple. Fast. Effective. Getting started is easy with our plug and play devices.
