

TRANSFORM STUDENT TRANSPORTATION WITH ADVANCED TELEMATICS.

REVOLUTIONIZE SAFETY IN TODAY'S SCHOOL BUS FLEETS.

On the T-Mobile nationwide network, Geotab's integrated telematics solution makes student transportation safer, more efficient, and more sustainable.

The number one priority of school bus drivers, fleet administrators, and school district leadership is to keep students safe on the road to and from school. Following safety, district leadership is in search of solutions to maintain schools bus fleets for longer and improve sustainable driving practices.

Driver activity notifications.

Maintain a safety-first culture by tracking bus locations and monitoring driver habits.

Ecosystem integrations.

Integrate with student information, routing, and ridership solutions for operational efficiencies.

Accident insights.

Limit liabilities and enhance safety by using data to reconstruct collisions.

Data accuracy.

Know the precise routes, stops, and starts of your buses with Geotab's proprietary curve-based logic algorithm.

Predictive maintenance.

Review usage reports and schedule routine maintenance to limit high repair costs.

Fleet electrification.

Help administrators determine where and when electric vehicles might be best implemented in your fleet.

SCHOOL BUS SAFETY DEPENDS ON GEOTAB INSIGHTS.

The Geotab equation for safer student transportation includes:

GO device.

Innovative, real-time tracking devices.

- Report on robust fleet insights
- Promote accountable driving
- Track buses and improve operations

Camera integration.

Crystal-clear, HD trip video and dash cams.

- Monitor student activity
- Mitigate lawsuits with video evidence
- Prevent accidents with AI-equipped dash cams

DVIRs.

Digital vehicle inspection reports.

- Log bus inspection data digitally
- Spot vehicle issues quicker
- Enhance regulatory compliance

The right maintenance at the right time.

Use Geotab to keep track of individual bus maintenance schedules to prevent downtime and reduce fleet size.

Fleet operations optimizations.

Geotab collects idling, speeding, and braking data to help fleet administrators identify and curb harmful driving habits, promoting driver and student safety while protecting your district's budget.
