Geotab and Mercedes-Benz Connectivity Services Integrated Solution in the US

World-class fleet management, one integrated platform for EVs and ICE vehicles and fleet visibility with insights at an enhanced frequency.

Geotab's fleet management experience is now enhanced with options that offer quicker GPS signals, for both EVs and ICE vehicles. Factory-installed telematics on Mercedes-Benz vehicles[1,2] enables seamless vehicle data integration from the OEM servers into Geotab's fleet management software, MyGeotab™. View high-quality data insights, such as vehicle location, speed, trip distance, electric vehicle (EV) charging status, fuel consumption (data, and more on one consolidated platform.

Plus, you can set up automatic warnings to notify fleet managers and drivers about vehicle health and other alerts. This integrated solution does not require any aftermarket hardware installation to access rich OEM vehicle data.

Key benefits:

Integrated fleet management

EV and ICE vehicle data from Mercedes-Benz Connectivity Services' servers is funneled to MyGeotab to help you make better-informed decisions, faster.

No additional hardware or installation required

Factory-installed telematics hardware on Mercedes-Benz vehicles help you save money and time, and does not require taking vehicles out of service for installation.

Powerful fleet management tools

Activity reports, risk and safety reports, detailed GPS tracking, vehicle health and other fleet metrics help you measure performance and improve productivity.

Cost advantage and remote activation

No additional hardware or installation expenses, helping to save time and money.

GEOTAB

Productivity

- Detailed GPS tracking
- Trips & activity reports
- Vehicle health data with battery, tire, engine signals and more

Sustainability

- Track oil life level and fuel range
- Route optimization
- Monitor charging time and range efficiency
- EV battery level and charging status

Fleet optimization

- Fuel management and charging data
- Maintenance planning
- Fleet benchmarking
- Tire pressure monitoring and indicators
- Warning indicators

Safety

- Risk and safety reports
- Track driving and speed data
- Monitor door and window status

Compliance

- Driver vehicle inspection reports (DVIR)
- Personal and business vehicle use reporting

Expandability

- Software development kit and APIs

The all-new eSprinter

Mercedes-Benz Connectivity Services

The synergy of Geotab's telematics technology and the variety of fleet data services offered by Mercedes-Benz Connectivity Services, along with factory-installed hardware on Mercedes-Benz vehicles provides a turnkey connected vehicle solution that helps maximize fuel management, charge range efficiency and reduce downtime while increasing productivity and efficiency. Collect and monitor rich, high-quality data from Mercedes-Benz[1] vehicles, all with end-to-end data security protection. With ready-to-go factory-fitted telematics and the MyGeotab fleet management platform, reaching a new level of connectivity is easier than ever.

[1] Vehicles compatible with this integration include the models designated in the Partner Guide.

[2] The Geotab and Mercedes-Benz Connectivity Services Integrated Solution is available throughout the US and is subject to individual models' verification with Geotab partners.
