Use data to save time and money for your business

Optimize vehicle uptime and lower operating costs with Geotab's innovative open platform for fleet management.

The Geotab advantage

Geotab's suite of products give you the insight and tools you need to make informed decisions and drive positive changes in operations and maintenance for the future. Get crucial vehicle data to help you optimize fleet operations, reduce costs, increase compliance and safety, and drive customer satisfaction. Geotab Intelligence uses AI to turn your fleet data into actionable insights — predicting risk, benchmarking performance and helping your team make faster, smarter decisions across every route.

Reduce collisions, boost driver safety

Use AI and video telematics to improve driver safety with in-vehicle coaching, real-time alerts and collision reconstruction. Monitor behaviors like hard braking and speeding to reduce risks and insurance costs.

Compliance made easy

Get effortless ELD compliance, certified in the U.S. and Canada. Digitally manage DVIR, HOS and IFTA with customizable defect lists and alerts to ease your mind.

Streamline day-to-day operations

Boost your fleet productivity with route optimization, real-time vehicle and asset tracking, and predictive maintenance. Manage fuel consumption and reduce idling for maximum efficiency.

Harness the power of data

Gain valuable fleet insights with Geotab. Benchmark performance, track progress and make data-driven decisions for a more efficient operation.

Steer your fleet in a green direction

Meet environmental regulations like CARB and EPA while greening your fleet. Track CO₂ emissions, target fuel waste and optimize driver behavior with Geotab's sustainability tools.

Customize Geotab to your needs

Geotab adapts to your fleet's needs. Configure rules, alerts and integrations with open APIs. Explore over 500 solutions on the Geotab Marketplace to extend the power of Geotab.

Telematics: more than just fleet management

Geotab – your partner for a safer, greener, and more efficient trucking business. With Geotab telematics for truck fleets, you can optimize routes, reduce costs, improve driver safety and stay compliant with regulations like CARB and EPA – we make it easy to track emissions and fuel consumption for easy reporting. Scale your operations with confidence.

Our open platform promise

Geotab's open platform empowers you to tailor your fleet management solution. With access to our APIs and SDKs, you can integrate seamlessly with existing systems, customize data analysis and develop unique applications. Explore over 500 solutions on the Geotab Marketplace to extend functionality and meet your specific needs.

Geotab in action

Nussbaum:

Nussbaum, a trucking company with 550 trucks in its fleet, upgraded its technology with Geotab resulting in data-driven strategies, enhanced safety and \$300,000 saved in insurance costs.

Key results:

- Streamlined data collection and automated reports improved efficiency.
- Real-time visibility enabled proactive asset management.
- Collision reconstruction data protected drivers and avoided false claims.
- Improved safety practices led to significant insurance premium savings.

Geotab's platform provides you:

AI-powered video telematics

The GO Focus family scales from privacy-first event capture to full 360° situational awareness – with GO Focus Plus as the right fit for most fleets. It uses ADAS and driver monitoring to detect tailgating, distraction and harsh maneuvers in real time, delivers in-cab voice coaching so drivers self-correct on the spot, and automatically prioritizes the coaching conversations that reduce risk and lower insurance costs.

Asset Tracking

The GO Anywhere family tracks everything from powered trailers to individual cargo assets – with GO Anywhere Plus as the right fit for most fleets. It keeps trailers, equipment and non-powered assets visible across your entire network with hybrid power, satellite connectivity that stays on even when cellular falls short and high-frequency theft-recovery mode that prevents deadhead costs and gets stolen equipment back fast.

Geotab Navigation

Truck-safe navigation based on your vehicle's dimensions and commercial road restrictions. Predictive risk alerts from millions of fleet trips help drivers anticipate hazardous roads before they reach them.

Expandability

Use the Geotab software development kit and hardware add-ons to get a completely unique and personalized experience.

TMS integration

Geotab seamlessly integrates with existing TMS systems, enhancing visibility, efficiency and automation.

Compliance

Geotab ELDs simplify compliance with automated logs, HOS tracking, and DVIR management.
