The Geotab advantage

Geotab helps field service fleets meet their operational challenges. Whether you need to monitor your fleet in real-time, implement intelligent scheduling or improve your customer experience, Geotab has a solution.

Track your fleet in real-time

Monitor the location, status and efficiency of your fleet to optimize routing, reduce travel time and improve service delivery.

Boost customer service

Provide your customers with accurate ETAs to build trust in your organization and create a strong client relationship.

Improve safety and compliance

Identify unsafe driving practices and use this data to provide feedback and training to drivers, improving fleet safety and adhering to regulatory compliance.

Protect your drivers

Use dash cams and in-cab alerts to support driver development and provide evidence to exonerate them in the event of false insurance claims.

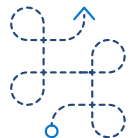

Digitize your maintenance

Monitor predictive maintenance analytics to identify and rectify minor vehicle faults before they become disruptive and expensive problems.

Green your fleet

Create a roadmap to electrification, using real-world data to provide certainty that your new EVs will drive strong environmental and financial savings over their service life.

Routing and Optimization

Optimize route planning and analyze fuel consumption and idling trends to reduce operating costs, improving your fleet's overall sustainability performance.

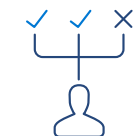

Optimize productivity

Ditch manual processes and automate tasks such as dispatching, scheduling and routing to streamline operations and enhance overall productivity.

Integrate into business infrastructure

MyGeotab offers full expandability to connect with your existing information infrastructure and help reduce data silos.

Make informed decisions

MyGeotab collects a vast amount of data from your vehicles and transforms this into actionable insights for informed decision-making and strategic planning.

Wiseway Supply Ltd.

Wiseway, a plumbing, electrical and lighting products supplier, uses Geotab for driver safety, fraud prevention and fleet maintenance. Check out their results!

- 2 point improvement in the fleet’s safety score
- 40% reduction in speeding events
- 40% reduction in idling

Orkin

Orkin, a pest control provider with 1.7M+ customers, uses Geotab to boost environmental responsibility and cut fuel costs. Here are some changes they’ve seen since implementation.

- 8.4% reduction in total idle time over three months
- Most improved driver cut idle time by 99.5%
- \$50,000 in estimated fuel savings over three months

The Geotab Marketplace

Geotab’s solution is adaptable. It’s built on an open platform, so you have more control and flexibility. You can integrate with over 200 marketplace partners to drive efficiency and manage costs across your fleet.

- Cameras & ADAS
- Mobile apps
- Routing and dispatching
- Predictive maintenance
- Asset tracking
- ERP software integrations
- Sustainability & EV charging partners

Flexibility and scalability

Simplify mixed fleet management with an advanced fleet management solution that integrates securely with OEM partners like Ford, GM and Stellantis. Gain a singular view of all of your vehicles within the Geotab platform whether your data comes from a Geotab GO device or OEM telematics.

Telematics: more than just fleet management

A telematics solution goes far beyond just basic fleet management. With the right telematics partner, you can optimize your safety, productivity and customer service performance with the help of informative insights delivered right to you on one single platform.

Geotab's platform provides you:
