

Geotab® Integrated Solution for Autocar® Trucks

Geotab Integrated Solution for Autocar Trucks — Integrated with factory-installed Autocar telematics hardware for fleet management. No installation, no downtime and no additional hardware required.

Geotab now offers a unique and expandable open platform for telematics for Autocar trucks¹. Embedded telematics hardware on Autocar trucks with Geotab-compatible technology gives fleet managers access to a wide range of fleet management services all from one easy-to-navigate platform, MyGeotab™. This platform includes activity reports, delivery schedules, GPS tracking, driver behavior monitoring and more to help reduce fleet costs, increase productivity and boost efficiency. Collect and monitor high-quality data from Autocar trucks, all with end-to-end protection on one consolidated platform².

Key benefits:

Integrated fleet management

All vehicle data from Autocar trucks is funneled into one consolidated platform, MyGeotab, for quicker and better-informed decisions

Cost advantage

No hardware or installation costs, saving you time and money

Increase efficiency

Activation of the Geotab solution is remote and contactless, optimizing the installation process

Maximize vehicle uptime

Embedded telematics on Autocar trucks and its remote, contactless activation maximizes vehicle uptime

Access to a premium plan and hardware

Access vehicle data with a Premium Plan subscription and data coming from built-in, embedded telematics hardware and sensors

Productivity

- Detailed GPS tracking
- Trips and activity reports
- Fleet reports

Safety

- Risk and safety reports for acceleration, braking and driver seat belt use
- Alerts on engine speed, fluid temperatures and general failures

Fleet optimization

- Data on fuel usage, oil life and more
- Active diagnostic faults, ignition status and more
- Engine and odometer data for better maintenance planning

Compliance

- Personal or business use
- Supports corporate sustainability

Sustainability

- Increased fuel efficiency
- Monitor engine coolant level and other malfunctions

Expandability

Expand your solution with access to Geotab Marketplace for your evolving business needs

GEOTAB®

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Marketplace, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with other data assets. As an IoT hub, the in-vehicle device provides additional functionality through IOX™ Add-Ons. Processing billions of data points a day, Geotab leverages data analytics and machine learning to help customers improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and remain compliant with any regulatory changes. Geotab's products are represented and sold worldwide through authorized Geotab resellers.

¹ All Autocar truck models from 2009 onward are compatible. This integration will be functional in the U.S and Canada.

² The Geotab telematics services are subject to the Geotab EUA and the Autocar Services are subject to the Autocar terms and conditions.
