

Geotab integrated solution for IVECO vehicles

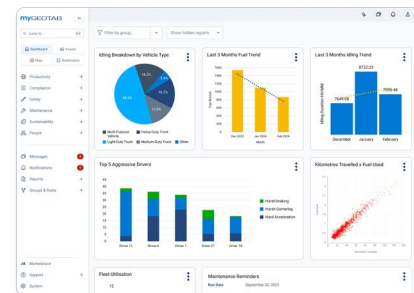

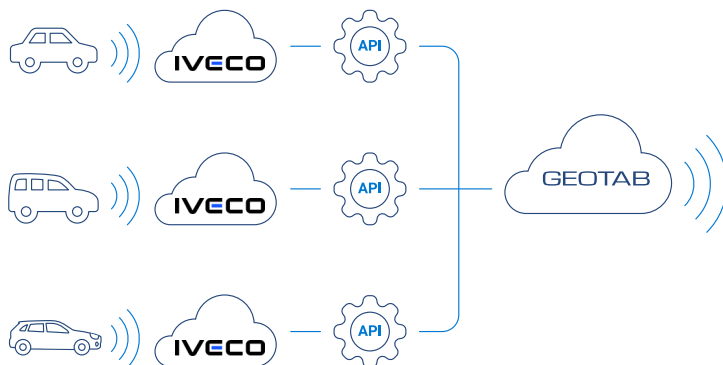

One integrated platform for connected and sustainable fleet performance.

Geotab® integrated solution for IVECO: Elevate your IVECO fleet management by leveraging deep insights for enhanced visibility and operational efficiency.

By leveraging IVECO's factory-fit connectivity, Geotab provides direct access to high-quality vehicle data — no aftermarket hardware or installation required. IVECO ensures data availability, consistency and a proven set of vehicle parameters, enabling centralized access to connected vehicle data through MyGeotab to analyze performance and drive informed business decisions.

Data points include GPS tracking, engine metrics, and warning indicators, fuel consumption, and maintenance information. This integrated OEM solution provides a significant cost advantage, allowing you to save both time and money with no aftermarket hardware or installation costs required.

One unified platform

Key benefits:

Integrated fleet management

Upon request from the fleet customer, IVECO vehicles are activated through the IVECO Service Agreement, and vehicle data is seamlessly integrated into the MyGeotab platform for actionable insights in one connected environment.

Tailored data access

Access broader vehicle insights based on your selected rate plan.

Maximize uptime

Leveraging OEM telematics and MyGeotab management features, vehicles operate at their highest utilization rate.

Powerful fleet management tools

Get activity reports, maintenance alerts, energy usage info, and other metrics to improve productivity and performance.

Operations

- Usage monitoring via odometer readings.
- Proactive Maintenance: Deep-dive monitoring of engine health, including oil pressure, coolant temperatures, and specific DPF (Diesel Particulate Filter) status to prevent costly breakdowns.
- Maintenance window planning and "Time to maintenance" management.
- Comprehensive Tire Intelligence: Specific tire pressure readings and status indicators for every individual wheel to improve safety and fuel economy.

Productivity

- Precise monitoring of arrivals and departures.
- Inventory management via zones.
- Vehicle health monitoring through warning data.

Safety

- Safety monitoring across your IVECO fleet through MyGeotab's alerting, reporting and rules engine to support safe driving behaviour and compliance.

Compliance

- Distinction between business and personal trips.

Sustainability

- Fuel level and EV Battery State of Charge (SoC %) monitoring.
