

Passenger transport fleet management solutions

Take complete control of your fleet operations and provide excellent passenger service.

Make your fleet safer, smoother, greener and leaner!

Geotab is passionate about supporting its customers to reduce their environmental and social impacts. Our passenger transport fleet management solution allows bus and coach operators to reduce their fuel consumption by improving the team's eco-driving performance and getting access to real-time insights on fuel usage and efficiency.

What can Geotab do for your bus and passenger fleet?

Safer passengers

Proactively manage fleet maintenance to keep vehicles running smoothly while monitoring driver behaviour to promote safer driving.

Lower operating costs

Improve fuel efficiency by gaining visibility into fuel usage trends, engine performance data and wasteful driver behaviour.

Increased vehicle uptime

Live monitoring of vehicle engine data and fault codes eases the transition from reactive to proactive maintenance.

Discover how our web-based software and vehicle telematics can help you take complete control of your passenger transport fleet and prepare it for the future

Reduce fuel consumption and CO₂ emissions

Actively control fuel usage and improve eco-driving performance to reduce fuel consumption and associated climate and health-impacting exhaust emissions. Then accurately measure your progress towards your sustainability commitments.

Get the insights you need to reduce your fleet's CO₂ emissions and to plan for electrification, improving local air quality.

Improve the productivity of your passenger transport fleet

Geotab's fleet maintenance software provides your maintenance team with live access to the vehicles' diagnostic faults and critical engine data. This enables your workshop to prioritise repairs and resolve minor issues before they become larger and more expensive.

It also helps them to reduce vehicle downtime and prevent expensive and unnecessary breakdowns that would otherwise impact productivity and service quality.

Make your drivers safer and happier

Provide your drivers with near real-time feedback on aggressive or stressed driving behaviour, in order to increase their safety and that of your passengers and the community.

Reduce fuel and energy consumption, and maintenance costs with less vehicle wear and tear, due to your drivers' new relaxed driving style.

Increase fleet efficiency to provide an optimal passenger service

When your business is transporting passengers, the safety, optimisation and maintenance of your fleet is paramount. Geotab's fleet management solutions provide you with current, actionable insights to keep your vehicles in peak condition and your business running smoothly.

The result is an exceptional passenger experience with timely and reliable operations, increasing your likelihood of repeat business.

"We believe that we are making a relevant contribution to higher air quality while simultaneously reducing our drivers' stress levels and increasing profitability."
