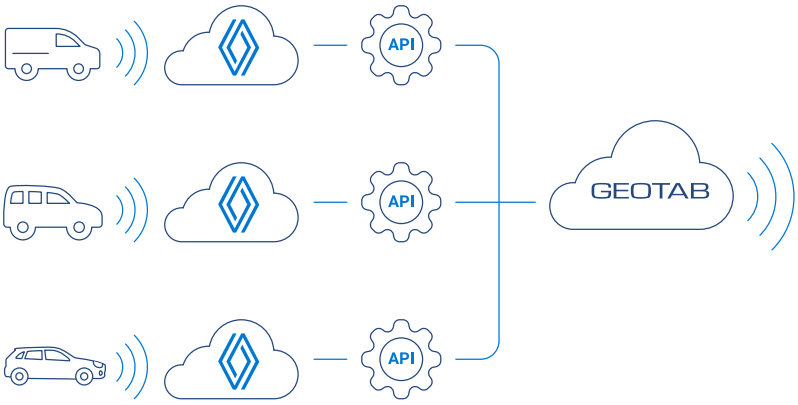
Geotab Integrated Solution for Renault

One integrated platform for advanced fleet management and powerful insights.

Geotab Integrated Solution for Renault, available for European fleets*, offers an open and expandable platform for telematics. Renault vehicles' telematics capabilities combined with the MyGeotab fleet management platform offers fleet management capabilities for mixed fleets. Connectivity on Renault vehicles can directly be activated for new vehicles at the end of the factory line or retrofitted for vehicles in the field.

Activity reports, delivery schedules, GPS tracking, the ability to monitor driver behaviour and other features help reduce fleet costs and increase productivity and efficiency. Collect and monitor high-quality data from Renault vehicles, all with end-to-end protection on one consolidated platform, MyGeotab.



One unified platform

Key benefits:

Integrated fleet management

All vehicle data is funnelled to the MyGeotab fleet management portal for quicker, better-informed decisions.

Maximise vehicle uptime

Renault's connectivity capabilities and remote activation maximises vehicle uptime.

Access to a richer plan

Access rich vehicle data powered by Renault Basic and Renault Premium plans.

OEM hardware

Telematics hardware from Renault helps you save time and installation hassles.

GEOTAB

Productivity

- Detailed GPS tracking
- Trips and activity reports
- Driver tracking

Sustainability

- Increase fuel efficiency
- Reduce repairs and improve maintenance

Fleet optimisation

- Fleet maintenance
- Fleet benchmarking
- Fuel management

Safety

- Risk and safety reports

Compliance

- Vehicle inspection reports

Expandability

- Software Development Kit and APIs

The power of Geotab's telematics technology, along with Renault vehicles' telematics capabilities, equip fleets with a turnkey connectivity solution that maximises fuel management, reduces downtime, and increases productivity and efficiency. Collect and monitor rich, high-quality data from Renault vehicles, all with end-to-end data protection. With ready-to-go factory-fitted telematics and the MyGeotab fleet management platform, reaching a new level of connectivity is easier than ever.

* Available in these European countries: France, Germany, United Kingdom, Spain, Italy, Poland, Belgium, Luxembourg, Slovenia, Austria, Switzerland, Czech Republic, Slovakia, Portugal, Hungary, Netherlands, Denmark, Norway, Sweden, Finland and Iceland. Most Renault vehicles manufactured after 2010 are compatible.
